

Production of in-house reference materials

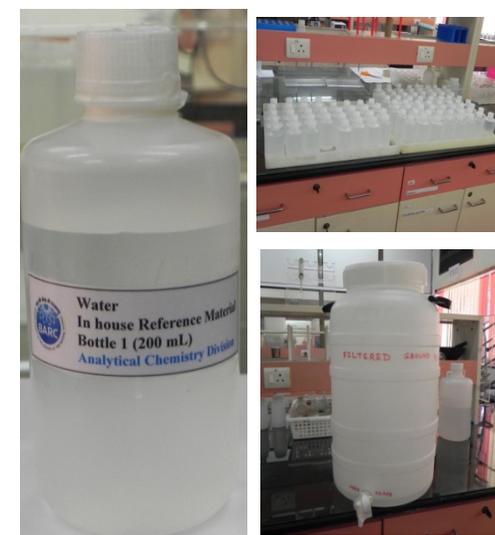

The use of Certified Reference Materials (CRMs) is a widely recognized tool for the verification of the accuracy of analytical techniques and they form an integral part of quality control systems used. Chemistry group has undertaken a unique programme for the production of CRM/in-house reference materials to cater the need of DAE and non-DAE institutes as well as to satisfy needs of Indian industrial sector together with the needs of social sectors.

Fe, Al in uranium turning

**Soil
(Al, Cr, Cu, Mn, Ni and Zn)**

**Potable water
(Fe, Zn, Co, As, Cd, Al)**
