

## Triple Axis Spectrometer

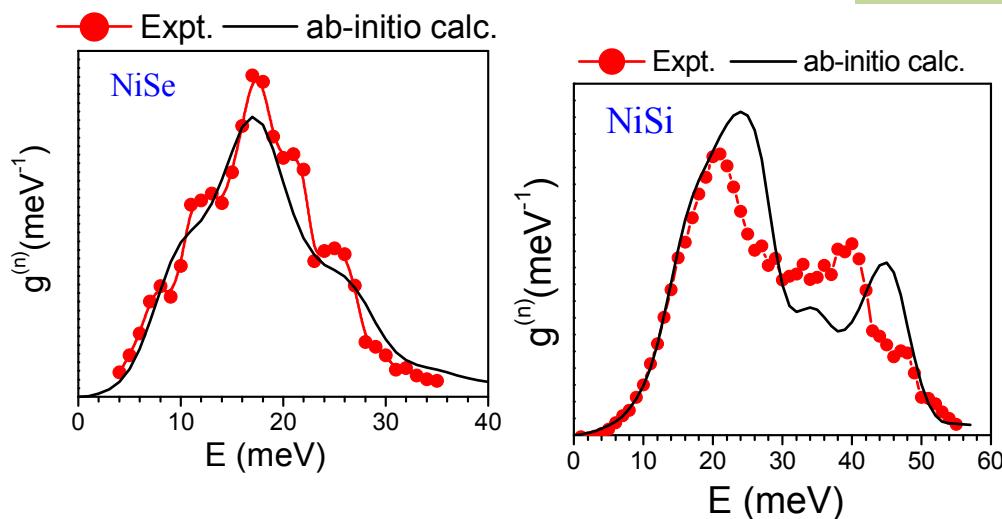

For inelastic neutron scattering experiments from single crystals/ polycrystalline samples

For measurements of phonon dispersion curves, phonon density of states, crystal field excitations, and quasielastic scattering.

Allows measurement of the scattering function at any point in (Q,E) space physically accessible by the spectrometer

Instrument parameters	
Beam hole	T1007
Monochromator	Focussing Cu(111)
Energy transfer range	up to 100 meV
Momentum transfer range	1-10 Å
Beam size	40 mm x 40 mm
Flux at sample	$10^7$ n/cm <sup>2</sup> /s
Analyzer	PG(0002)
Scattering angle	up to 100°
Detector	<sup>3</sup> He counter

Interesting electronic and magnetic properties.  
Promising material for solar cells.

NiSi has potential applications in electronic and energy devices.

Elastic energy resolution 15 %,  
Sample temperature 10-300 K
