

# PRESAM 220/540 Inspection System

- PREssure tube SAg Measurement (PRESAM) system is developed for In-Service Inspection (ISI) of 220 and 540MWe Indian PHWR coolant channels
- PRESAM technology has been transferred to NPCIL and is being used in all Indian PHWRs for coolant channel ISI
- Using the system more than 90 reactor coolant channel sag measurements have already been completed successfully
